OverTime	0.0	High Pay	708.1

Price: GHC 2500 <= 100 employees
GHC 3000 > 100 employees

Key features of Paybase include

- Multi-user application – multiple users can log in simultaneously and at different levels of data encapsulation.
- Customizable for every working environment
- Payroll processing at the click of a button – Monthly payroll processing takes averagely 2 minutes for a company of 250 employees.
- Reverse payroll - reverse payroll to undo all mistakes made during data capture.
- Role-based security - users can be assigned a single role or multiple roles. Roles define user access and permissible activities in the system.
- User-based security - Every user activity in the system including payroll processing is tied to the user's login credentials
- Dynamic reporting – Generate extra reports and tie them seamlessly into the system without system downtime.
- Standard reports - including tax reports, bank reports, pay sheet, employee reports
- User level access - users can only see data tied to their access i.e. payroll clerks cannot see data of senior management unless granted permission by the system administrator.
- Automatic income tax, Provident fund, and Overtime computations
- Loan deductions
- Taxable/Non Taxable Allowances
- 3 months free support

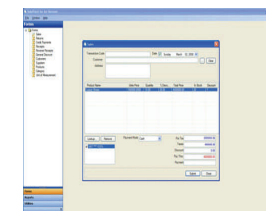

Custom Packages

Softbase can create custom designed software to your exact specifications. We take the time to understand your business and your business processes, build models to match your specifications and upon your approval develop software to meet your specifications. This includes Internet applications, Server applications, Multilingual applications, GUI applications, SMS and Mobile Applications.

Softbase has round-the-clock support services for our clients. This ensures your business never goes down due to software unavailability. Contact Softbase support by email:

support@softbasegroup.com

Software developed by Softbase are secured and user-friendly. All our software packages feature dynamic reporting which implies extra reports can be developed and added on the fly without system downtime.
